

Force Technologies celebrate 39 years in business

Force Technologies Ltd. are proud to celebrate their **39th anniversary**, marking nearly four decades of supporting critical industries with legacy and obsolete semiconductor solutions.

Founded in **1986**, Force Technologies has become a trusted partner to the defence, aerospace, transportation, and industrial sectors delivering bespoke solutions that ensure continuity when components become obsolete or discontinued.

Reflecting on the milestone, CEO Karen Salmon, who joined the company in 1988, said:

“The pace of innovation in our industry has been relentless, but what’s never changed is our focus on quality, continuous improvement, and our commitment to supporting customers through every challenge.

As we look to the future, we’re investing in new technologies, expanding our capabilities, and continuing to lead in the obsolescence and legacy semiconductor space.”

Force Technologies continues to grow as a leader in this highly specialised field, helping organisations extend the life of mission-critical systems through advanced testing, component replication, and lifecycle management.
