

Trailing Edge Technologies announce EMEA representative partnership

Following on from our initial inclusion into the IIOM, we are delighted to announce an EMEA representative partnership with Approved Technology (ATGBICS) who specialise in legacy solutions for network transceiver modules (SFP SFP+ QSFP OSP). Plug in replacements, fully warrantied and guaranteed supply to suit customer product life expectancy (www.atgbics.com).

Trailing Edge will continue to pursue products, technologies and services that are of direct value and benefit to customers experiencing complex supply chain issues caused by obsolescence, end-of-life and diminished source instances.
