The following information is intended to provide attendees with more information on the presentations

Introductory IOM Presentation to New Attendees including a Case Study

Jon Anslow will briefly introduce IOM to new members and guests before sharing a case study to show how obsolescence works in practice.

IOM International Update – Wolfgang Heinbach, IOM International President

Wolfgang will update the audience on overseas chapter development, conference development, and other international matters.

New Member introductions

Four new corporate members will be invited to deliver short presentations on their business and what their expectations are in joining the institute.

Introduction to a complimentary trade association – Andrew Evans, GAMBICA

GAMBICA is the Trade Association for Instrumentation, Control, Automation and Laboratory Technology in the UK. They are a very active organisation engaged in lobbying, representing their members, organising events and contributing to standardisation and environmental efforts to support their diverse members.

Andrew will introduce the organisation and share some of their industry concerns with regards to obsolescence management.

Avoiding Counterfeits in the Safran Supply Chain – Thomas Whitcomb, Safran Electrical & Power

Safran expert Thomas will describe their best practice and experiences in managing counterfeit risks in their avionics business.

Reach Update – Terry Rees-Pedlar, BAE Systems

Terry will deliver his regular Reach and environmental legislation update.

Managing Obsolescence as a Global Integrator and Maintainer – Stuart Broadbent, Alstom

Stuart will discuss how the rail industry is starting to look at obsolescence (all maintenance tenders now include obsolescence treatment risk transferred to maintainer, for example, and changes to standard trading conditions. Stuart will also discuss what Alstom as an integrator (and maintainer) is doing across its global business.

Panel Discussion – Counterfeits: Are we really managing the problem?

Experts from IOM and other invited guests will discuss questions from the audience.

The experts will be able to cover:

Recommended best practice and standards

MOD best practice and industry guidance applicable to any sector

Reporting and information sources

Testing and inspection of suspected devices

Legal position following receipt of counterfeits

Update on Professional Development – individuals and Companies- Phil Wardle IOM

Phil will update attendees on the progress of the AIOM scheme, early planning for the higher levels of individual qualifications as well as introducing the new concept of professional accreditation for companies, particularly solution providers.
