

CMCA(UK) Successfully Deliver the First of Four AIOM Training Courses to the US

CMCA(UK) is pleased to announce that the first of four scheduled AIOM training courses for the US Department of Defence (US DoD) has been successfully delivered. The course was attended by various members of the US DoD and IOM US Chapter industry partners including Robin Brown OSD DMSMS Program Manager. Many of the students completed the training as part of their professional development but others participated to assess whether the course will add value to various job roles within their government or industry organisations.

The course was delivered across three days and in Eastern Seaboard Time, so there were some long days for our trainer, Mr Jerry Franks.

The course was deemed a success with some excellent feedback from the participants, although noting that students requested that IOM review the syllabus to incorporate some of the additional material included in the latest IEC 62402:2019 standard!

The next course is scheduled for late June and we very much look forward to delivering it and to enable more and more students in the US to become IOM US chapter members.
