

### **Rochester Electronics Appoints Luke Fitzpatrick as Director of Aerospace & Defence**

We are thrilled to announce that Luke Fitzpatrick has been appointed Director of Aerospace & Defence at Rochester Electronics EMEA. This appointment underscores our ongoing commitment to addressing the critical semiconductor obsolescence issues that impact the aerospace and defence sectors. Luke brings a wealth of industry expertise and a track record of strategic leadership within the electronics industry. In this new role he will be instrumental in defining and executing strategy focused on driving customer success in these key vertical sectors. Rochester Electronics continue to invest in supporting aerospace and defence as well as other key markets to provide comprehensive and sustainable solutions to the complex challenges of semiconductor supply, ensuring that our customers receive the highest level of support, expertise and market intelligence.

Luke has long been a supporter of IOM having attended his first COG members meeting circa 2006 and has supported many of today's member organisations. He will be in attendance at the remaining 2024 UK members meetings as well as the International Symposium in Colonial Williamsburg, where Rochester Electronics are a headline sponsor.
